

Methylene Chloride (DCM) in Solvent Cements: a Hazardous Ingredient

Did you know that the use of products containing methylene chloride, an ingredient in many adhesives used for sign assembly, is regulated by both **OSHA** and the **EPA**?

Bond with confidence
using Weld-On's **DCM-free**
range of solvent cements

✓ No EPA-imposed
restrictions on use

OR

Research, spend, and
worry using products
containing DCM

✗ Subject to EPA regulations

- Is the way I'm using the product compliant?
- Am I within acceptable exposure limits?
- Is my exposure control plan sufficient?
- Do I have the proper respiratory protection?
- Are my usual gloves OK to use?
- Am I keeping all of the records I need to?
- Am I at risk for audit findings or fines?

The choice is clear: Choose Weld-On® for a safer, streamlined approach to sign fabrication — without the burden of complex regulatory requirements.
